1. Proses Instalasi Web Server

• Install Web Server XAMPP

The image shows a web browser displaying the Apache Friends XAMPP website. The page title is "XAMPP Apache + MariaDB + PHP + Perl". It includes a "What is XAMPP?" section explaining that XAMPP is a free, easy-to-install PHP development environment. Below this, there are download links for Windows, Linux, and OS X, all for version 8.0.10 (PHP 8.0.10). A "Download" button is also present.

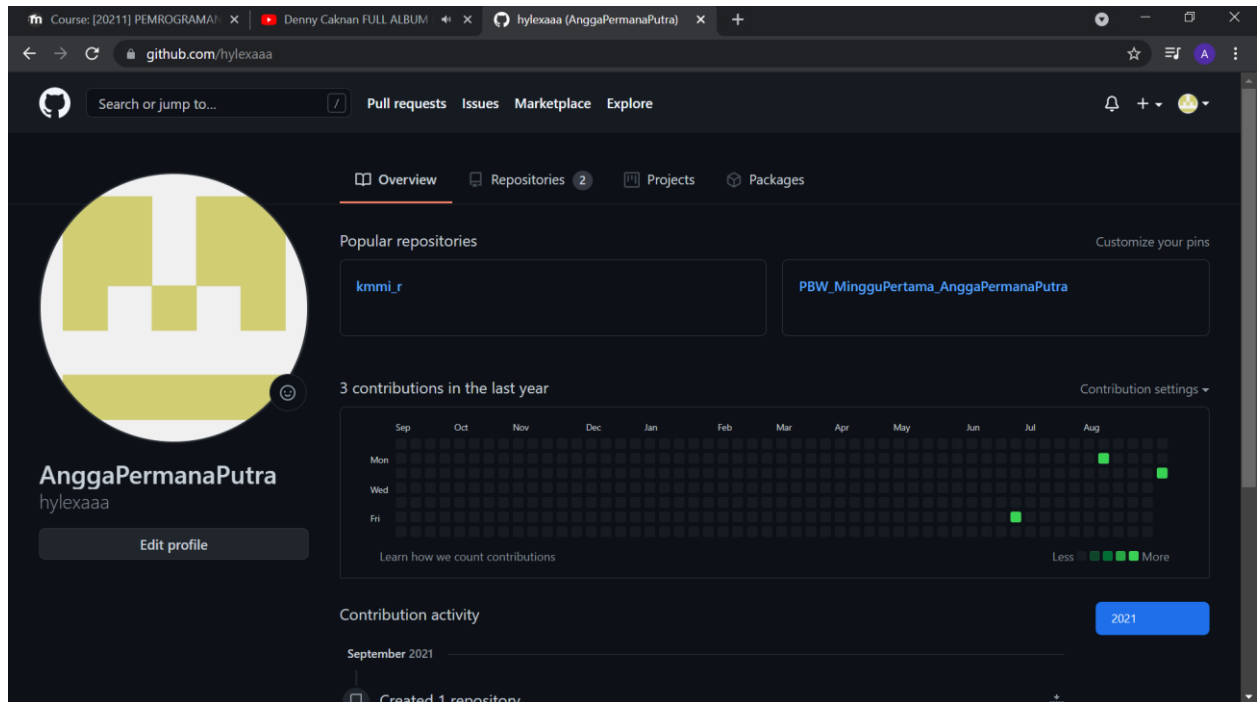

Below the website screenshot, the XAMPP Control Panel v3.2.4 is shown. The interface includes a table of services and their status, and a log window at the bottom.

Service	Module	PID(s)	Port(s)	Actions
Apache	Apache	7960 11976	80, 443	Stop Admin Config Logs
MySQL	MySQL	3306	3306	Stop Admin Config Logs
FileZilla	FileZilla			Start Admin Config Logs
Mercury	Mercury			Start Admin Config Logs
Tomcat	Tomcat			Start Admin Config Logs

The log window shows the following output:
